Career Objective:

Motivated and detail-oriented Web Full-Stack Engineer with a strong foundation in full-stack development and hands-on experience in automation and deployment. Skilled at building scalable applications and leveraging cloud-native technologies to deliver secure and reliable systems. Seeking to contribute to a growth-oriented organization while continuously enhancing expertise in cloud, development and infrastructure engineering.

Technical Skills:
- Web Development: React.js, Node.js, Express.js, HTML5, CSS3, Bootstrap
- Databases: MongoDB
- Version Control & Collaboration: Git, GitHub
- DevOps & Cloud: Docker, Kubernetes, Jenkins, GitHub Actions, GitLab CI, Terraform, Ansible, GCP, Linux Administration, AWS (learning), Azure (learning)
- Scripting & Programming: Bash, PowerShell, Java, JavaScript
- Monitoring & Logging: Prometheus (learning), Grafana (learning)
- Soft Skills: Problem-solving, teamwork, adaptability, time management

Projects:

ShopEase – E-Commerce Platform (MERN Stack)
Role: Full-Stack Developer
ShopEase is a modern e-commerce web application built with the MERN stack. It offers a seamless online shopping experience for users and robust admin tools for product and order management.
- Designed and developed the application.
- Implemented secure user authentication and JWT-based authorization for different user roles.
- Designed responsive UI using Bootstrap CDN, optimizing layout for both desktop and mobile.
- Created dynamic product listings, cart functionality, and order tracking system.
- Developed RESTful APIs with Express.js for cart, orders, and admin control.
- Built admin dashboard with capabilities to add/edit/delete products and view order history.
- Used MongoDB for structured data storage and schema modeling with Mongoose.
- Ensured error handling, route protection, and API middleware for better security and performance.

SkyScribe – Note-Taking Web App (MERN Stack)
Role: Full-Stack Developer
SkyScribe is a note-taking app designed for individuals who want a clean, distraction-free environment for organizing tasks and thoughts. It supports multi-theme views and user authentication.
- Built intuitive user interface with support for light and dark modes using CSS and React state management.
- Implemented secure user registration, login, and JWT-based session handling.
- Enabled full CRUD functionality for creating, updating, and deleting notes.
- Developed custom middleware to ensure route protection and secure data handling.

- Optimized MongoDB schema to manage user-specific notes.
- Used Git for code management and worked collaboratively on feature implementation.
- Focused on performance optimization and smooth transitions for better UX.

Work Experience:

Robotronix Engineering Tech Pvt. Ltd.
Position: Web Full-Stack Development Intern
Duration: Jan 2025 – May 2025
Worked as a Full-Stack Developer Intern on a robust e-commerce platform tailored for small-to-medium businesses. ShopEase was built using the MERN stack to support modern shopping features, an intuitive admin dashboard, and real-time order management. The project emphasized performance, security, and scalability.
- Built and optimized a full-stack e-commerce platform with modern DevOps practices
- Built a responsive UI using React.js and styled it with Bootstrap via CDN.
- Designed product grids and reusable components to enhance user interaction.
- Implemented JWT-based login/signup system with secure access controls for users and administrators.
- Developed and consumed RESTful APIs using Express.js, connecting the frontend to backend services and MongoDB database.
- Created a powerful admin interface with features like Add/Edit/Delete Products, manage user roles, and view order statuses.
- Used Mongoose to define schemas for users, products, orders, and reviews, with optimized querying for performance.
- Participated in rigorous testing cycles to identify and resolve bugs.
- Improved application performance and code quality.
- Managed source code using Git and GitHub, collaborating with team members through pull requests and branching strategies.

Education:
- Medicaps University | 2023 – 2025
    - Master of Computer Applications
- Sri Sri University | 2018 – 2021
    - Bachelors in business administration - IT
- Macro Vision Academy | 2016 – 2018
    - 12th Standard
- Macro Vision Academy | 2014 – 2016
    - 10th Standard

Certifications & Training:
- Java Programming Fundamentals – Udemy
- Agile Software Development – Udemy
- Git & GitHub – (Hands-on experience via personal and team projects)
- Cloud & Dev-Ops Engineering – Udemy
